PRICE—Rs. 10/-

PREFACE

THIS volume contains the entire series of data collected and tabulated at the Gwalior Census of 1941. In compiling it I have for the most part adhered to the general system and arrangement laid down in the all-India Census plan. On this occasion Census Tabulation has been a truncated operation almost throughout India. In this State, however, it has been carried out in full and this volume, therefore, furnishes almost as full information as has been contained in the Tables Volumes of the earlier censuses.

The tables dealing with population are of three kinds. The first which are called Imperial Tables present separately absolute figures for each district and city. The second called Subsidiary Tables are appended to Imperial Tables to explain the main figures with reference to particular problems and local areas. The third kind of tables are State Tables which descend to more minute particulars and provide figures for the smaller units of the State.

An outstanding feature of the volume are the eight Special Tables giving some important Village Statistics. These provide a condensed picture of the basic living conditions in rural Gwalior and show at a glance what the villages and the village population in each Tehsil have and what they lack in the matter of communications, medical aid, education, water-supply, marketing facilities, etc., etc. The primary data on these various points were collected on the spot and after full investigation by the Census Supervisors in the course of their preliminary visits to the villages in their circles. The investigation was completed by the end of 1940 but owing to unforeseen obstacles it has not been possible to finish the compilation and tabulation of the results as soon as I anticipated. The tables form an integral part of the Village Directory which constitutes Part III of the series. But as this volume is in Hindi and may not reach most outside readers at all I have decided to include them in the present volume also. I believe that the information they provide is of special statistical interest apart from any consideration of its immediate utility. I also venture to hope that it is a contribution of some little value to the record of the Census of 1941.

In conclusion I have to express my gratitude to all who have given assistance to me in the operations of the Census. In all parts of the country generous service has been given throughout the work by Census Officers of all kinds who are too numerous to be mentioned by name. As always, the brunt of the work up to the actual census fell on the Revenue Officers. I am indebted to them the more in view of the heavy extra work which they had to do in connection with the preparation of the first Electoral Rolls of the new Houses of Legislature which in pursuance of the wishes of the Government were compiled in association with this Census. Particular acknowledgments are due to the Subas and other District and Municipal Officers for their co-operation at all stages. But perhaps the first and greatest debt of thanks is due to the rank and file of the census army, the Charge Superintendents, Super-

PREFACE

visors and Enumerators who whether private persons or officials gave their services ungrudgingly and often at considerable inconvenience to themselves.

I must also express my deep obligations to my office staff. From start to finish they have worked with a devotion and enthusiasm which it would be difficult to surpass. Among senior officers I would mention first and foremost Mr S N Bamroo M. A., LL. B. whose work as Deputy Census Commissioner deserves all praise. During the enumeration stage as well as later on in the office I found his assistance invaluable. I have also reason for special gratitude to Dr Prakash Chandra, Mr S N Bamroo's successor who devoted much time and labour in recording for my use many valuable notes. Mr Daya Ram Gupta my Personal Assistant, deserves the same high praise as was given him at the two previous censuses. He was particularly helpful in supervising the post-enumeration proceedings and the tabulation of the results and in handling the large establishments of casual employees most of whom were unaccustomed to discipline and continuous hard work.

I had much to do with the Alijah Darbar Press. The volume of work to be done was on this occasion enormous and I owe a great deal to Mr Shirke, the Manager for complying with all my requirements in an efficient manner. I owe him also apologies for the inconvenience caused by my impatience and repeated calls for fresh proofs of altered Village Tables.

To Rajmantrapravina S P Rajagopalachari, Home Minister I owe more than I can say for constant interest and helpfulness.

My obligations to Mr M. W. M. Yeatts Census Commissioner for India, are profound. To him I am particularly grateful for help and advice in connection with the compilation of Village Statistics.

Finally and above all I owe a deep debt of gratitude to the Durbar for their generous support to me at all stages of the work.

GWALIOR,
Dated 2nd March 1944 }

INTRODUCTION

THE decade 1931-41, whose progress this census measures, has been a period of unusual developments. It witnessed two remarkable phenomena (1) an unparalleled growth of population and (2) an equally unparalleled slump and a fall in commodity values. These confusing factors continued to dominate the situation till the close of the year 1939 when India found itself in the midst of history's greatest War. The entrance of this last factor into the general situation and the rapid sequence of events during the last three years have thrown the earlier history of the decade into the background. They have also brought in their train changes and problems which have imparted considerable additional importance to the results of the recent census.

It is therefore more than usually incumbent to provide for the general reader first a brief account of the methods of the census and secondly a brief summary of its broad results. To do so is the more necessary on this occasion as no report of the old omnibus style giving topic by topic the main census results has been compiled for this census.

1 The Census Operations.

The first census of the Gwalior State was taken in 1881. In this and the succeeding censuses upto, and including that of 1911, Gwalior was included in the Central India Agency, in all the others taken in 1921, 1931 and 1941 the State has been a separate unit.

This the seventh census of the State was taken on the 1st of March 1941. As in 1931, the Gwalior Census Act provided the legal basis for the operations.

This census differed widely in its methods from its predecessors. The use of the old Census Schedule was given up and the census was taken on "Billets individual," or separate forms for each person. Each of these forms was in fact a Census Schedule and after the completion of enumeration these forms, that is, the actual original census records, went straight to the Tabulation Office and were themselves sorted for the tables. The adoption of this system rendered the expensive slip-copying process unnecessary. The next major change was the abolition of the one-night system of simultaneous enumeration which required each enumerator to check and revise in the course of a single night round the entire census record prepared during the previous weeks. On this occasion the final census return was completed over a number of days and related to the census hour which was Sun-rise in the morning of the 1st of March 1941. Another important departure was the decision to make a record of the population as far as possible at their normal place of residence. The object was to secure not an instantaneous photograph of the population but a really acceptable measurement of the normal resident population of the State and its component parts. The new system worked excellently and was a complete success. It reduced appreciably the strain and hardship to which the whole agency of enumerators and supervisors was formerly exposed and has at the same time contributed a great deal to the accuracy and efficiency of the enumeration.

INTRODUCTION

The actual work of the census falls under two main headings: (a) the collection of the data for which a large army of unpaid workers is improvised for a period of eight months and (b) the tabulation and compilation of results for which Government maintains a temporary staff. The carrying out of these extensive operations the delimitation of the area to be covered by each enumerator the arrangement for the training of the latter the appointment of the supervising officials for the supervision of enumeration work, the printing and distribution of the necessary forms the transformation of the raw material of the returns into the final tables are all processes which involve considerable preparation and planning in advance. On this occasion preliminary arrangements were initiated by Home Department's Notification as early as the 27th May 1939. This announced my appointment as Census Commissioner for the State and laid upon all Government servants and members of the public the duty of rendering all possible assistance to the Census Officers in carrying out the census.

The initial step was the preparation of a village or town register in which was shown a complete list of towns villages and hamlets in each Tehsil the number of houses and the number of workers available in each locality. On the basis of this register the whole area of the State was parcelled out into sub-divisions. In doing this the standard procedure laid down by the Census Commissioner for India was followed. The system was again built up on the house and the general method was to find a local man to enumerate his neighbours and to train him to do so. The houses were first grouped into "Blocks" a block containing from 75 to 125 houses each in charge of an Enumerator. This was the real census

unit and the enumerator was the individual on whom fell the bulk and brunt of the enumeration work. He it was who came into contact with the general public and who by personal enquiry at each house prepared the census record of each person residing within his block. Above the block came the 'Circle' comprising from 10 to 15 blocks under a

Supervisor who was responsible for the work of all the enumerators in his circle. Circles were then grouped according to Tehsils, towns and other recognised administrative divisions into Charges under Charge Superintendents who exercised general supervision over the operations and tested and checked the work of their subordinates. The former whose charges completely covered the whole district area worked directly under the District Census Officer. The district corresponded with the Revenue district and the charge was generally co-terminus with the Tehsil or Municipal town. The District Census Officer was the Suba of the District and the Charge Superintendents were as a rule either Tehsildars or Pargana Judicial Officers and in case of towns the local Municipal Officers. The city of Lashkar was treated as a separate Census District and the President of the City's Municipality was appointed as its District Census Officer. Cantonments were censused by the Military authorities and the enumeration of big compact estates was left in the hands of their Kamdars.

The whole area of the State having thus been accounted for in terms of circles and blocks the next step was the finding of the personnel for these sub-divisions. This was done by the Charge Superintendents with the aid of the General Village Register. In point of fact the Supervisors were appointed first and the Enumerators were

INTRODUCTION

selected later with their assistance. In rural tracts the Supervisors and the Enumerators were mostly village officials, school masters, etc., but in some places local men also had to be roped in to assist. In towns the best possible use was made of the various Government and Municipal establishments, the educated public being called upon to help only after these had been exhausted. After appointing the staff but before finally allotting blocks to each enumerator, every house in the State was marked with a number and entered up in a list. Special importance was attached to the preparation of these lists and district officials had to make very careful inspections to ensure that the work was properly carried out. These lists showed separately the residential and non-residential buildings giving in the case of the former, information as to the number of rooms and the material used in the construction of walls and roofs. They also gave a distribution of the normal residents of each residential house by age, sex and community and thus afforded the means of checking corrupted census returns.

After the house-numbering had been completed blocks were finally allotted to the Enumerators. The total number of Enumerators was 21,282 working under 2,301 Circle Supervisors and 163 Charge Superintendents.

During the preliminary organization I and the Deputy Census Commissioner visited all the districts and most of the important Tchsils to see that the numerous instructions issued were understood and observed. Another object of this tour was to explain to the Charge Superintendents the methods to be followed in collecting the Village Statistics—a task which had to be undertaken and finished along with the preparation of the house-list.

During the months of October, November and December the census staff was thoroughly trained in its duties. I, my Personal Assistant and the Deputy Census Commissioner between us toured over the whole State and trained almost all the Charge Superintendents and their assistants. The latter held frequent conferences at convenient centres and trained the Supervisors. These made the best use they could of the Enumerators who also received training from the Charge Superintendents. Brief instructions and specimen entries for the Enumerators were printed in a separate booklet and manuals with fuller instructions were issued to every one down to and including Supervisors.

These arrangements being complete and each class of census officers having received the requisite training all was ready for the actual enumeration. This was done in two stages, the Preliminary and the Final. In the course of the former operation the Enumerators visited each house and after personal enquiry wrote up a separate enumeration slip for each person ordinarily resident in each house. The information recorded consisted of name, community, sex, conjugal condition, birthplace, race or caste, details as to literacy, mother-tongue, subsidiary languages, details as to occupation, industry, dependency, and unemployment and in the case of married women age at the birth of first child, sex of first child and number of children born and surviving. This record was completed in rural areas between February 15 and 27, 1941, and in urban areas between February 20 and 27. As the slips were filled in they were continually checked and re-checked by all supervising officers, right upto the census day. In this task the help of all touring officers of the Government was also enlisted.

INTRODUCTION

The final census was taken on the actual Census Day and the following two days. During this period each Enumerator visited in turn every house in his block and revised the record with reference to the actual facts at the Census Hour which was sunrise on March 1 1941. For further details as to the manner in which new-comers, new-born infants and persons located under abnormal conditions were dealt with the reader is referred to page 4 of this volume.

As soon as the final record was ready the Enumerators met at appointed places and prepared statements showing the number of the houses and the population of the blocks. The figures were then compiled by the Supervisor into a summary for his circle and taken to the Charge Superintendent who compiled a similar summary for his charge and sent to the Headquarters where the totals were added together and the provisional figure reported to the Census Commissioner for India. The difference between this provisional total of the population of the State and the figure eventually arrived at by the Central Office and now entered in the various Statistical tables was only 3 per cent or 348 persons in 10000.

After the despatch of the provisional totals the Charge Superintendents were required to peck and send off without delay all enumeration books to the Headquarters at La hkar where the subsequent operations were to be conducted in a single office. On arrival the slips were sorted in pigeon-holes successively according to the entries of community age etc. to obtain the statistics required for publication. Each sorter dealt with some 25000 slips and entered his results in a series of forms called 'Sorters' Tickets. The process was by no means as simple as it may

appear from this brief description but these are the essential features of it. The next stage was compilation the process by which the results shown in sorters tickets were brought together to give statistics for the population of tehsils towns and districts. The compilation registers thus prepared with the sorters tickets were then transferred to the tabulation office where compilation was checked and the final tables prepared.

An important feature of the census was the addition of an enquiry into the circumstances and prospects of each village the results of which are embodied in the village directory which constitutes Part III of this series. The directory shows against each village the following particulars —

- (1) Number of residential houses
- (2) Distribution of population by sex and community
- (3) Number of literate persons.
- (4) Distance from the nearest
 - (a) Metalled Road,
 - (b) Railway Station
 - (c) Dispensary
 - (d) Primary School
 - (e) Mandi
 - (f) Hat or Bazar
- (5) The market day
- (6) Particulars as to the adequacy or inadequacy of the supply of drinking water and the distance of the source of water supply
- (7) Name of seasonal diseases or epidemics to which it is liable.
- (8) Particulars as to the industries of the village and the approximate annual value of the articles manufactured

INTRODUCTION

These facts are in themselves of the greatest interest specially when studied in conjunction with one another and against the back-ground of the population changes that have taken place in individual villages during the last forty years. The information will also be helpful in mapping out the regions of decay and in determining the targets for village uplift work

The attitude of the public towards the census was on the whole satisfactory. All concerned cordially helped in the operations. The demeanour of the unpaid workers was excellent throughout. For services rendered in the taking of the census all Census Officials were granted certificates or Sanads. The Enumerators received certificates from the Charge Superintendents and the Supervisors from the District Census Officers, while Sanads of four classes—Special, First, Second and Third—were granted to District Census Officers, Charge Superintendents, Assistant Charge Superintendents and those Enumerator and Supervisors whose work was found specially commendable. The Sanads of the Special Class were issued over the signature of His Highness the Maharaja Scindia, those of the First Class were signed by the Home Minister and those of the Second and Third Class by the Durbar's Census Commissioner.

II Summary of Census Results

The State occupies 1/67th part of the land surface of India and contains slightly over 1/100th part of its population.

According to the final results of the 1941 Census the total population of the State on March 1, 1941, was 4,06,159 as compared with 3,523,070 in the same area on February 26, 1931, an increase of 483,089 or 13.7 per cent in the decade as compared with 10.3 per cent

in the decade 1921-31. In India as a whole the increase has been 15 per cent, in United Provinces 13.7, in Central India 13.08, and in States and Agencies 14.5 per cent. The density of the population of the State as a whole has risen from 134 in 1931 to 152. The density is highest in the Bhind District, which has 276 persons to the square mile, then come Gird (263), Morena (215) and Mandsaur (177). The Districts of Shivpuri, Goona and Sheopur are comparatively thinly populated.

Of the total population of over forty lacs, seven lacs live in villages of less than 500 inhabitants, nine lacs in villages of 500-1,000 inhabitants, six lacs in villages or small towns of 1,000-2,000 inhabitants, 3 lacs in towns of 2,000-5,000, 85 thousand in towns of 5,000-10,000, 114 thousand in towns of 10,000-20,000 and the rest in the bigger towns. Of every thousand persons found in the State 832 were born in the districts where they were enumerated. In 1931 the figure was 895. Of the total population of 4,06,159 as many as 3,614,418 were born in districts within the State. Of the rest 370,537 were born in provinces or states adjacent to the State and 20,963 in other parts of India. Of the 370,537 persons born in the adjacent provinces or states 239,244 were women and only 131,293 were men. Nearly two-thirds of the migration may therefore be assumed to be due to marriage customs rather than to economic conditions.

Of the 593,508 persons below the age of 5 in the State, 866 boys and 1,606 girls are married. Among Hindus 847 boys and 1,561 girls are married below the age of 5. No other community shows any considerable number of marriages at this age. Between the ages of 5 and 10, there are altogether

INTRODUCTION

8 020 married boys and 21,057 married girls, of whom 5,811 and 20,397 are Hindus and 147 and 620 Muslims. Between the ages of 10 and 15 there are 133 052 persons married out of 445 542. Of these 127 009 are Hindus 5 069 Muslims 933 Jains 28 Sikhs and 13 Christians. Between the ages of 15 and 20 there are altogether 367,873 persons of whom 102 231 males and 10 863 females are still unmarried. Of Hindus the number of unmarried women between the ages of 15 and 20 is 8,973 and the number of married and widowed and divorced is 147,574 that is, more than 16 girls are married for every one who is not. In 1931 the ratio was 12 to one. Among Muslims there are 1 711 women unmarried at this age for 8,839 married or rather more than 5 married for one who is not. In 1931 the ratio was about 7 to one. Marriage is almost universal in this State specially for women and the position in this respect has not appreciably changed in the last forty years. Infant and child marriage is still prevalent specially among the lower castes of both Hindus and Muslims but the introduction of the Child Marriage Prevention Act in the year 1930 has brought down the number of married and widowed of both sexes below the age 10 appreciably lower than at any time during the last forty years. The proportion of widowed has decreased in all communities and localities owing to the fewer number of child marriages and relatively light mortality of the last decade.

The total of all persons recorded as following an occupation is 1 102,057. Of these 759,805 are engaged in production of raw materials including 759,289 engaged in pasture and agriculture. The total of cultivators is 740 793 for 635,820 of whom cultivation is the principal occupation. These two figures

do not include 2 666 engaged in cultivation of special crops, fruits etc. 3,320 engaged in forestry nor 12,435 engaged in stock raising. The number of tenant cultivators is 311,654. There are 184 339 persons employed in the preparation and supply of material substances this includes 117,803 engaged in industry of whom 22 818 are concerned with textiles, 17,918 with working in leather 11 080 with working in wood, 3,834 with metals 10,136 with ceramics 4,803 with chemical products 6 735 with food industries 2,118 with industries of dress and toilet and 5 848 with building. There are 4,651 makers of jewellery and ornaments and 5 676 persons employed in scavenging. Transport workers number 10,386 and there are 56 170 employed in trade. The police including village watchmen, number 11 065 and the army 5 164. Public administration claims 23 075. There are 7,306 persons employed under religion and 1 001 lawyers, mukhtars petition writers and their clerks. Medicine claims 2,346 and instruction 4 468. There are 24 767 persons in domestic service.

The total return under the head of beggars and vagrants is 15,905.

There are per 10 000 persons 2,751 independent workers and 7,249 total dependents. This means that every independent worker has to support 2.6 dependents. Every independent worker in the vast group supported by Pasture and Agriculture has to support as many as three dependents.

Of the total State population of 4 006 159 the number returned as literate in any script is 284,623 of whom 30,368 were females. The number of persons literate in English was 29,014 of whom 2,280 were females. Among Hindus there is one literate person for 17 illiterate and one literate woman for 82 illiterate.

INTRODUCTION

In 1931 the proportion was 1 to 29 for both sexes combined and 1 to 135 for women. Among Muslims 1 person is literate for 8 who are not, and one woman for 20 who are not. The proportions in 1931 were 1 to 12 and 1 to 43. It is remarkable that more persons in the age group 15-20 are literate than in the group 10-15 which has a larger total. This means that a large number of children do not become literate until after they are 15.

Of the 4,006,159 inhabitants of the State 2,192,615 persons returned Hindustani as their mother-tongue. This term includes Hindi, Urdu and Hindustani. Other vernaculars proper to this State are Brijhashi, Bundelkhari, Bhili, Banjari, Malvi and Sipari. Marathi was returned as the mother-tongue of 29,627 persons, Gujarati 15,586, Rajasthani 162,025, Eastern Hindi 6,550, Punjabi 1,750 and various other Indian vernacular less than 1,000 persons each.

There are now 3,708,376 persons in the State classified as Hindus. Of these 245,168 are backward classes, i.e., Bhils, Bhilalas and Saharias. Jains number 52,714, Sikhs 2,342, Muslims total 240,903 and Christians 1,615. For every 1000 of population there are 9,257 Hindus against 9,293 in 1931 and 9,318 in 1921. For Muslims, the ratio has risen from 555 in 1921 and 580 in 1931 to 601 in 1941. Jains have also increased from 123 per 10,000 in 1921 and 123 in 1931 to 132 in 1941.

Though "Caste" was on this occasion excluded from the all-India scheme of tabulation it has been necessary to construct a special caste table for administrative purposes. The outstanding feature of this table is the tendency of castes low in the social scale to claim new names, of higher origin or the names of higher

castes with some variations. This time claims of the kind were more pressing owing to the formation of Sabhas for almost every considerable caste. Castes have been tabulated under the older and better known names in order to facilitate comparison with the figures of previous censuses. This desire to obtain or record a rise in the social scale has been responsible at recent census for some wider variations in the strength of certain castes.

The main features of the statistics presented in the special Village Tables, at the end of the Volume, are summarised in the following statements—

1. Roads

| District | Percentage of total population living in villages which from the nearest road are at a distance of— | | | |
|---------------|---|------------|-------------|----------------|
| | Below 5 miles | 5—10 miles | 10—20 miles | Above 20 miles |
| 1. Gird | 81.4 | 12.6 | 3.0 | |
| 2. Mandlaur | 75.3 | 14.0 | 5.1 | 1.7 |
| 3. Ujjain | 72.2 | 22.0 | 5.8 | |
| 4. Bilhara | 70.1 | 23.6 | 6.3 | |
| 5. Sheopur | 68.0 | 22.0 | 9.2 | 6 |
| 6. Morena | 67.0 | 29.4 | 2.7 | |
| Gwalior State | 67.8 | 23.3 | 8.1 | 8 |
| 7. Sardarpur | 66.0 | 22.3 | 11.7 | |
| 8. Bilind | 65.0 | 23.8 | 10.6 | 6 |
| 9. Shivpuri | 63.7 | 27.2 | 8.0 | 1.1 |
| 10. Shahapur | 57.7 | 29.6 | 12.2 | 5 |
| 11. Goona | 55.3 | 27.0 | 16.4 | 1.3 |

2. Railways

| District | Percentage of total population living in villages which from the nearest Railway Station are at a distance of— | |
|------------------|--|----------------|
| | 10 miles or less | Above 10 miles |
| 1. Gird | 83.0 | 17.0 |
| 2. Ujjain | 73.3 | 26.7 |
| 3. Mandlaur | 67.4 | 32.6 |
| 4. Morena | 65.8 | 34.2 |
| 5. Bilhara | 55.0 | 45.0 |
| 6. Shahapur | 53.0 | 47.0 |
| 7. Sheopur | 47.8 | 52.2 |
| 8. Goona | 41.6 | 58.4 |
| 9. Bilind | 30.1 | 69.9 |
| 10. Shivpuri | 21.6 | 78.4 |
| 11. Sardarpur | 2.0 | 98.0 |
| Gwalior State .. | 52.3 | 47.7 |

INTRODUCTION

3. Hospitals

Percentage of total population living in villages which from the nearest Hospital or Dispensary are at a distance of—

| District | Distance | | | District |
|---------------|----------------|------------|----------------|--------------|
| | Within 5 miles | 5-10 miles | Above 10 miles | |
| 1. Gird | 53.8 | 32.8 | 13.6 | 5. Bardarpar |
| 2. Bhind | 55.2 | 39.6 | 5.2 | 6. Ujjain |
| 3. Morena | 29.6 | 47.1 | 30.3 | 7. Shivpur |
| 4. Sheopur | 30.2 | 24.6 | 45.3 | 8. Sheopur |
| 5. Sheopur | 19.5 | 38.6 | 42.2 | 9. Shejapur |
| 6. Gooma | 34.9 | 41.6 | 23.3 | 10. Gooma |
| 7. Bhilai | 23.6 | 34.0 | 43.2 | 11. Bhilai |
| 8. Ujjain | 42.1 | 36.7 | 19.2 | |
| 9. Mandawar | 38.3 | 34.6 | 26.1 | |
| 10. Shejapur | 47.3 | 44.4 | 8.3 | |
| 11. Bardarpar | 53.3 | 37.1 | 9.6 | |

4. Schools

Percentage of total population living in villages which from the nearest School are at a distance of—

| District | Distance | | District |
|-------------|----------------|-------------------|---------------|
| | Within 3 miles | 3 miles and above | |
| | | | 6. Gird |
| | | | 6. Bilai |
| | | | 7. Gooma |
| | | | 8. Mandawar |
| | | | 9. Ujjain |
| 1. Bhind | 63.8 | 6.2 | 10. Bardarpar |
| 2. Morena | 85.2 | 6.2 | 11. Shejapur |
| 3. Gird | 82.8 | 11.8 | |
| 4. Mandawar | 82.8 | 17.5 | |

Percentage of total population living in villages which from the nearest School are at a distance of—

| Within 2 miles | 2 miles and above |
|----------------|-------------------|
| 65.8 | 34.2 |
| 66.4 | 34.6 |
| 62.3 | 37.7 |
| 67.0 | 40.0 |
| 62.4 | 47.6 |
| 48.5 | 50.5 |
| 48.8 | 51.2 |

5. Mandis

Total population of villages which from the nearest Mandi are at a distance of 10 miles or more

| Total Rural Population | Percentage of Rural Population |
|------------------------|--------------------------------|
| 371,186 | 89.6 |
| 311,311 | 78.7 |
| 96,639 | 70.2 |
| 262,269 | 70.2 |
| 228,506 | 69.4 |
| 143,366 | 61.6 |
| 364,741 | 61.1 |
| 25,349 | 36.9 |
| 126,693 | 32.9 |
| 55,064 | 29.9 |
| 102,742 | 29.8 |

GENERAL NOTES ON TABLES

1 During the period since 1931 some districts and parganas have been given, in place of their traditional names, the names of the towns in which their headquarters are located. The districts and parganas whose names have thus been changed are these —

(a) Districts

| <i>Former Name</i> | <i>Present Name</i> |
|--------------------|---------------------|
| Tonwarghar | Morena |
| Narwar | Shivpuri |
| Isagarh | Goona |
| Amjhera | Sardarpur |

(b) Parganas

| | |
|------------|-----------|
| Mastura | Ghatigaon |
| Nurabad | Morena |
| Bajrangarh | Goona |
| Kumbhraj | Chachaura |
| Amjhera | Sardarpur |
| Bakaner | Manawar |

As these changes have been notified and are actually in force the names in column 2 above have been used throughout the present series of census tables

2 In the Imperial Tables figures are given for administrative districts. This arrangement is required for administrative purposes but in order to bring out the broader aspects of the census the territory of the State has been divided into Natural Divisions in which natural and other features are more or less homogeneous or uniform. This has been done in Subsidiary Tables in which the districts have been regrouped according to the Natural Divisions in which they lie. The Natural Divisions adopted for the present census are the same as in 1931, namely, the Plain, Northern Plateau, Southern Plateau and Hilly Divisions. The districts included in these four divisions are as follows —

| Divisions | Districts |
|------------------|--|
| Plain | Gird, Bhind, Morena and Sheopur |
| Northern Plateau | Shivpuri and Goona |
| Southern Plateau | Bhilsa, Ujjain, Mand-saur and Shajapur |
| Hilly | .. Sardarpur |

IMPERIAL TABLE I

Area, Houses and Population

1 *General*—This table shows for each district the area, the number of towns and inhabited villages, and a distribution of occupied houses and population between urban and rural areas. Similar details for parganas are shown in State Table I which appears after this table.

2 *Area*—The area of the State according to the revised figures supplied by the Survey of India is 26,008 square miles. This is 359 square miles less than that shown in the table.

As the revised figures now furnished by the Survey of India have not so far been accepted by the Land Records Department, the 1931 figures have been adopted. Differences between the Survey of India figures and those now adopted are shown in the marginal table. If the figures furnished

| District | Area in 1931 | Area in 1941 | Area according to the Survey of India |
|--------------|--------------|--------------|---------------------------------------|
| 1 Gird | 1,712 | 1,875 | 2,010 |
| 2 Bhind | 1,718 | 1,555 | 1,657 |
| 3 Morena | 2,004 | 2,004 | 1,927 |
| 4 Sheopur | 2,366 | 2,366 | 2,524 |
| 5 Shivpuri | 3,876 | 3,792 | 3,872 |
| 6 Goona | 4,477 | 4,554 | 4,266 |
| 7 Bhilsa | 1,905 | 1,912 | 1,711 |
| 8 Ujjain | 2,741 | 2,736 | 2,446 |
| 9 Mandasaur | 1,777 | 1,777 | 1,977 |
| 10 Shajapur | 2,460 | 2,465 | 2,287 |
| 11 Sardarpur | 1,331 | 1,331 | 1,331 |
| Total | 26,367 | 26,367 | 26,008 |

by the Survey of India are adopted the result will be a slight increase in the density of the State as a whole and some changes in the density figures of individual districts, but these changes are

not expected to vitiate any of the conclusions based on the areas adopted at this census. The area of some districts shown in the table differs from that shown in the corresponding table for 1931. This is due to inter-district transfers referred to in the title-page to Imperial Table II.

Situated within the Gwalior State there are two small tracts, namely, the Gwalior Residency Headquarters and the Neemuch Cantonment which are under British administration. The area and population of these tracts are set out below —

| | Area in square miles | Persons | Males | Females |
|--------------------------|----------------------|---------|-------|---------|
| 1 Residency Headquarters | 164 | 99 | 65 | |
| 2 Neemuch Cantonment | 411 | 11,119 | 6,126 | 4,993 |

3 *Definitions*—"Towns" in columns 3 and 6 means places treated as towns or cities for the purposes of Imperial Tables IV and V and "urban" in columns 9, 12 and 15 means persons enumerated in these places.

"Villages" in columns 4 and 7 means revenue villages other than —

(i) those which are wholly absorbed in cities or towns, and

(ii) those which at the time of the enumeration, *i.e.*, at sunrise on the 1st of March 1941 contained no population.

"Rural" in columns 10, 13 and 16 means persons enumerated elsewhere than in towns.

Imperial Table I

The number of revenue villages whose

| Name of village | Name of town in which absorbed |
|----------------------|--------------------------------|
| 1. Ahukhana Kalan | Lashkar City |
| 2. Ahukhana Khurd | " |
| 3. Keshibeg | " |
| 4. Dondiapora | " |
| 5. Ramtipora | " |
| 6. Madam pahar | " |
| 7. Lalitpur | " |
| 8. Gadrassia Mahibag | " |
| 9. Alaga | Jouna |
| 10. Shivpur T. kra I | Shivpur |
| 11. Shivpur Tukra II | " |
| 12. Amdipora | Narwar |
| 13. Sikandarpur | " |
| 14. Hat ka pura | Chanderi |
| 15. Shergarh | Bhilai |
| 16. Mahapora | Shajapur |
| 17. Doal | " |
| 18. Magria | " |
| 19. Jagannathpora | Manawar |
| 20. Bhassadpora | " |

inhabited sites lie with in the municipal limits of towns or cities is 20 The names of these villages together with the name of the town in which they have been absorbed is given in the marginal

table. The number of inhabited villages is thus the number shown in column 4 *plus* 20 or 10 579

Houses in columns 5—7 means census houses A census house is any building or buildings or part of a building occupied by members of one commensal family along with their servants and dependants The number of occupied houses thus represents fairly accurately the number of families in the State

4 *System of enumeration*—The system of enumeration followed at the previous censuses consisted of two distinct operations First there was an enumeration of the persons ordinarily resident at each individual house This operation which occupied a considerable time formed the real basis of the enumeration. To this was added a one night final count which consisted of a hasty revision of the preliminary record in the light of the vital events and other changes which had occurred since the preliminary count. This one-night operation disappeared at this census and in its

place was substituted a system designed as far as possible to produce a record of the normal population such as the provisional enumeration of the former census gave

The population was classed under "House , Institutional and Floating For the enumeration of House population a period was fixed which in case of villages extended from the 15th to the 27th February and in that of towns from the 21st to the 27th February 1941 All the persons ordinarily associated with the locality during the enumeration period were assigned to their residence and persons who were temporarily absent at the time were also enumerated unless the period of their absence extended beyond the period of enumeration. Casual visitors were not enumerated unless the enumerator satisfied himself that those visitors had not been counted elsewhere and were also not likely to be so counted. On the first of March and the two following days the record was revised with reference to the central point of enumeration, which was sunrise on March 1st 1941 that is to say new comers who had not been enumerated elsewhere and new born children were added to the list and persons who had died were struck off

The census of the Institutional population by which is meant the inmates of such institutions as hostels hospitals etc. was taken on the evening of the 28th February and that of the Floating population in the early hours of the following day In either case care was taken to count only those who had not been enumerated elsewhere

5 *Urban rural population*—According to the standard definition agreed to at the Census Conference urban areas with 5 000 population and more were to be treated as towns.

Applying this definition to this State the total urban population comes to 486,579 and the urban rural ratio to 1-7.

6 *Subsidiary Tables*—The following Subsidiary Tables are appended to this table —

- (i) Density, Water-supply and Crops,
- (ii) Area and Population, actual and percentage, by pargana density,
- (iii) Persons per 1,000 houses and houses per 1,000 square miles

7 *Some novel features of the Census of 1941*—The usual procedure in census operations is to prepare a house-list before embarking on the actual task of enumerating the population. On the present occasion residential and non-residential houses were differentiated and structural details and information as to accommodation was collected in respect of residential houses only. The enquiry yielded the following interesting results

- (1) The total number of residential and non-residential houses was 1,163,955 of which 837,840 were in the occupation of families while 326,115 were non-residential. The latter included shops, temples, office buildings and other structures used for keeping cattle or the storage of goods.
- (2) Of the residential houses 440,233 or 52.5 per cent contained only one room, 191,625 or 22.9 per cent two rooms, 97,000 or 11.6 per cent three rooms, 52,414 or 6.3 per cent four rooms and 56,565 or 6.7 per cent more than four rooms.
- (3) Of the occupied houses 48,431 or 5.8 per cent were occupied by the Muslim families and the rest by others.

(4) As to the material used in the construction of walls and roofs of buildings, the following figures will be found of interest —

| <i>No of buildings with walls of</i> | <i>No of buildings with roofs of</i> |
|--|--|
| Mud 687,835 or 59.1 % | Tiles 542,096 or 46.6 % |
| Stone 254,388 or 21.9 % | Thatch 188,407 or 16.2 % |
| Bricks, baked 119,389 or 10.3 % | Stone slabs 149,610 or 12.9 % |
| Bricks, unbaked 35,911 or 3.1 % | Mud 146,709 or 12.6 % |
| Bamboo, leaves, etc , 65,696 or 5.6 % | Lime 92,388 or 7.9 % |
| Corrugated iron sheets 523 or 0 % | Corrugated iron sheets 44,032 or 3.8 % |
| No walls 213 or 0 % | No roofs 713 or 0 % |

In the course of the preparation of the house-list an attempt was also made to arrive at an estimate of what might be called the number of Gwalior citizens. To achieve this end adult males and females and children under 14 years belonging to each household were entered in separate columns against that household. Care was taken to include such members of the household as were living outside the limits of the State and absentee wives and to exclude married daughters.

The following results were disclosed —

| | | |
|-----------------------|----|------------------|
| Adult males | .. | 1,250,332 |
| Adult females | .. | 1,169,528 |
| Boys of 14 and under | . | 833,529 |
| Girls of 14 and under | . | 689,808 |
| Total | . | <u>3,943,197</u> |

Imperial Table I

8 *Village Statistics*—Another special feature of the present census has been the compilation of village statistics. These were collected by the supervisors in the course of their first visit to the villages and include among other things the following particulars in respect of each village —

- 1 Distance of the village (in miles) from the nearest
 - (a) metalled road
 - (b) railway station
 - (c) dispensary
 - (d) primary school

(e) Mandi and

(f) Hat or bazar

2. The market day of the village (if any)
- 3 Particulars as to the adequacy or inadequacy of the supply of drinking water and the distance of the source of water supply from the village
- 4 Name of seasonal disease or epidemic to which the village is liable.
- 5 Particulars as to industries of the village and the approximate annual value of the articles manufactured

The results of this investigation are contained in Part III of the present report

Imperial Table I—Area, Houses and Population

| District | Area in square miles | Towns | Villages | Occupied Houses | | |
|----------------------|----------------------|-----------|---------------|-----------------|----------------|----------------|
| | | | | Total | In towns | In villages |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |

IMPERIAL TABLE II

Variation in propulation during the last forty years

1 *General*—This table corresponding to Imperial Table II of 1931 shows a comparison of the population recorded in 1941 with that for the same areas at previous enumerations

2 *Adjustments*—The first census of the State was taken in 1881 and since then a decennial census has been held. The total population of the State in 1881 and 1891 as shown in the Central India Agency Census Reports for those years was 2,993,652 and 3,378,774, respectively. These figures are not accurate. The reason for this is that first the areas covered by these censuses differ from each other and secondly on both these occasions certain areas actually belonging to the State were excluded and such others were included as have since ceased to form part of its territory. The figures for these two censuses

now given in the margin represent the adjusted figures for the area as it now stands. The figures for the subsequent censuses have also been similarly treated but as there have been no pronounced changes in the State area during the past four decades the resulting

differences in the population figures are not particularly important.

Differences between the district figures now given and those shown in the previous census reports are for the most part due to

inter-district changes of jurisdiction. Adjustments on account of all such transfers have been incorporated in the figures given in this table. Details of these adjustments are given in the supplement printed after the table.

3 *Variation in population*—The variation in population during each of the last six decades and during the whole period of sixty years from 1881 to 1941 is shown below —

| Variation | | | Increase (+) | | Decrease (—) | |
|--------------------|--------------------|--------------------|--------------------|--------------------|--------------------|--------------------|
| 1931 to 1941 | 1921 to 1931 | 1911 to 1921 | 1901 to 1911 | 1891 to 1901 | 1881 to 1891 | 1881 to 1941 |
| +483,099 | +329,894 | —42,127 | +161,652 | —447,616 | +429,663 | +914,555 |
| +13 7 | +10 3 | — 1 3 | + 5 3 | —12 7 | +13 9 | +29 6 |

The most interesting decades of the series are 1891-1901 and 1911-1921. The decrease in the first was due to a series of devastating famines while that in the second reflects the ravages of the influenza epidemic of 1918-19. Between 1901 and 1911 there was a diminished increase, the diminution being due to the famine of 1907-08, to the malaria epidemic of 1908 and the plague. Much of the increase found in 1891 was due probably to improved methods of enumeration but the decade itself was also prosperous and immune from serious calamities.

4 *Variation in district population*—Variations in the population of a district within so

Imperial Table II

short a period as a decade are of little significance. On the other hand, variation within the last forty years should reflect tendencies and features which distinguish particular areas from the general run of the territory. The figures below illustrate the differential characteristics of such areas. The most arresting figures are those of the sparsely peopled districts of Bhilsa and Sardarpur and of the closely packed districts of Morena and Bhind. The former show the heaviest proportional increases while in the latter which were probably the greatest sufferers in 1899-1901 the increase has been almost nominal. Sheopor has the reputation of being the most unhealthy district in the State and is at the same time one of the regions which are most exposed to famine. The main general conclusion which the figures suggest is that the growth in the south is more rapid than in the north.

| District | Per centage increase since 1901 | Density | |
|------------------|--|---------|------|
| | | 1901 | 1941 |
| 1 Bhilsa | 80.2 | 74 | 133 |
| 2 Sardarpur | 73.1 | 78 | 135 |
| 3 Ujjain | 49.9 | 113 | 169 |
| 4 Mandla | 45.1 | 132 | 177 |
| 5 Guna | 42.8 | 73 | 104 |
| 6 Sheopor | 32.4 | 117 | 155 |
| State as a whole | 39.3 | 117 | 182 |
| 7 Gird | 20.9 | 218 | 283 |
| 8 Shivpur | 20.3 | 97 | 117 |
| 9 Morena | 14.1 | 186 | 215 |
| 10 Bhind | 8.6 | 254 | 276 |
| 11 Sheopor | 6.6 | 67 | 61 |

SUPPLEMENT TO IMPERIAL TABLE II

Statement showing the adjustment made in the area of 1931

| Name of District or Pargana | Area in 1931 | Gain since 1931 | Loss since 1931 | Present area | Remarks |
|------------------------------|--------------|-----------------|-----------------|--------------|--|
| Gird District | 1,712 | 384 | 221 | 1,875 | On account of the transfer of Gohad Pargana from Bhind to Gird District and Bhandar Pargana from Gird to Bhind District |
| Bhind District | 1,718 | 221 | 384 | 1,555 | |
| Joura Pargana | 452 | 2 | | 454 | On account of the transfer of village Dongarpur from Sabalgarh to Joura Pargana |
| Sabalgarh Pargana | 532 | | 2 | 530 | |
| Shivpuri Pargana | 1,677 | | 112 | 1,565 | Forty-eight villages of Jagir Parone and two villages of Jagir Pohri which were included in this Pargana have been transferred to Kolaras and Goona Parganas |
| Kolaras Pargana | 1,008 | 28 | . | 1,036 | Eleven villages of Jagir Parone and two villages of Jagir Pohri have been included in this Pargana |
| Goona Pargana (Bajrangarh) | 1,946 | 84 | 690 | 1,340 | Jagirs Arone Raghogarh, Garha and Dharnaoda have been transferred from this Pargana to Pargana Chachaura and 37 villages of Jagir Parone have been added |
| Pachhar Pargana | 830 | 84 | 79 | 835 | On account of the transfer of 71 villages from Mungaoli to this Pargana and 28 villages from this Pargana to Mungaoli |
| Mungaoli Pargana | 1,057 | 79 | 91 | 1,045 | On account of interchange of territory as above and transfer of three villages of Jagir Bahadurpur to Basoda Pargana |
| Chachaura Pargana (Kumbhraj) | 644 | 690 | | 1,334 | On account of the addition of Arone, Raghogarh, Garha and Dharnaoda Jagirs |
| Basoda Pargana | 1,175 | 7 | | 1,182 | Three villages of Jagir Bahadurpur added |
| Ujjain Pargana | 587 | | 5 | 582 | Two villages of Berchha Jagir transferred to Shajapur Pargana |
| Neemuch Pargana | 672 | . | 38 | 634 | Forty villages belonging to Neemuch Pargana have been transferred to Jawad Pargana |
| Jawad Pargana | 299 | 38 | | 337 | |
| Shajapur Pargana | 592 | 5 | | 597 | Two villages of Jagir Berchha added to this Pargana |
| Total | 14,901 | 1,622 | 1,622 | 14,901 | |

IMPERIAL TABLE III

Towns and Villages Classified by Population

1 This table corresponds to Imperial Table III of 1931 and shows the number and population of inhabited localities classified according to the size of their population. In this table 'village' has the same meaning as in Table I and only such localities have been treated as towns as are so treated in Imperial Tables IV and V.

Floating population in column 22 of the table includes persons found in coolie camps, hotels, dharmshalas, etc. who admitted that they had not been enumerated elsewhere and includes those also who were found homeless in the morning hours of March 1st 1941.

2. In column 2 the figure 10,605 is a combined figure composed of 46 towns and 10,559 inhabited villages. The corresponding figures for 1931 are 10,895 and 10,852 respectively. There has thus been a decrease of 293 in the number of inhabited villages since the last census. In this connection it must be pointed out that the census tables show only the number of inhabited villages and this number may and does fluctuate and can in no case correspond to the number of revenue villages. The aggregate number of revenue villages in Gwalior in 1941 is 11,672 which is greater by 141 than the corresponding figure 10 years ago. Of this total the number uninhabited is 1,047 or 411 more than the corresponding figure of 1931. The details are shown in the inset.

| Year | Total number of revenue villages | Inhabited villages | Uninhabited villages |
|-----------|----------------------------------|--------------------|----------------------|
| 1931 | 11,531 | 10,895 | 636 |
| 1941 | 11,672 | 10,625 | 1,047 |
| Variation | +141 | -270 | +411 |

The progressive increase in the number of uninhabited revenue villages suggests a gradual disappearance of small villages and a definite tendency to a movement towards the bigger villages. This is evidenced by the fact that the proportion of persons living in villages with a population of 500 or less has fallen from 546 per thousand to 488.

3 This table is accompanied by Subsidary Table III (i) which shows the distribution of population between towns and villages. A comparative study of the latter set of figures with those of 1931 will not be without interest. The figures are given below in a tabular form —

| District | Number per 1 000 who live in villages | | Population per village | |
|-----------|---------------------------------------|------|------------------------|------|
| | 1931 | 1941 | 1931 | 1941 |
| State | 888 | 863 | 288 | 327 |
| Gird | 641 | 609 | 299 | 365 |
| Bhind | 962 | 958 | 458 | 505 |
| Morena | 950 | 937 | 448 | 517 |
| Sheopur | 950 | 942 | 230 | 263 |
| Shivpur | 939 | 937 | 290 | 327 |
| Goona | 828 | 914 | 205 | 227 |
| Bhilsa | 935 | 916 | 245 | 249 |
| Ujjain | 798 | 759 | 266 | 325 |
| Mandsaur | 849 | 822 | 244 | 296 |
| Shajapur | 940 | 910 | 298 | 342 |
| Sardarpur | 946 | 936 | 254 | 293 |

Towns and Villages classified by population

From the above comparison the following conclusions emerge —

(1) The proportion of the rural population has fallen in every district and the fall is most marked in the districts of Gird, Ujjain, Mandsaur and Shajapur

(2) The average population per village has risen in every district and, as in 1931, it is highest in Bhind and Morena and lowest in Goona, Bhilsa and Sheopur districts

IMPERIAL TABLE IV

Towns classified by population with variation since 1891

1 *Definitions*—The definition of a town at this census was that of 1931, i.e. besides municipalities and cantonments every other continuous collection of houses inhabited by not less than 5 000 persons was to be treated as a town for the census purposes.

2. *Number of towns and variation in their number*—In this State there is no town with a population of 5 000 or more which is not under some form of municipal government. There are in all 55 municipalities and 6 cantonments in the State. In this table the population of all these cantonments has been included in that of the towns adjoining them while in Imperial Table V the population of each cantonment has been shown separately from that of the larger unit.

Out of the 55 municipal towns 40 have been treated as towns and the remaining 15 which are only overgrown villages have been excluded from the table. The localities so excluded are (1) Dabra (2) Lahar (3) Mehgaon (4) Ater (5) Ambah (6) Bijaypur (7) Pichhore (8) Isagarh (9) Kumbhraj (10) Nahargarh (11) Singoli, (12) Barod (13) Kanad (14) Amjhara and (15) Bagh.

The number of towns in 1931 was 43. This number has gone up to 46. Seven places viz. (1) Pichhore (Gird) (2) Chachaura, (3) Baghana (4) Nalkhera (5) Susner (6) Goona cantonment and (7) Agar cantonment have been promoted to urban status for the first time while four places (1) Morar Town (2) Gwalior Town (3) Isagarh Town and (4) Karera Cantonment have been ex-

cluded. Morar and Gwalior towns have been included in the Lashkar City. Isagarh has definitely lost such urban characteristics as it may once have had and the diminutive cantonment at Karera has been abolished.

The number of towns shown in this table is 41 whereas it is 46 in all the other tables. The reason for this is that in this table the cantonments of Lashkar Morar Goona, Ujjain and Agar and the towns of those names have been treated together.

3 *Cities*—For purposes of the census a city was defined as—

- (1) any town whose population in 1931 was not less than 100 000
- (2) any other town which the Local Government declares to be a city for census purposes.

Of the 40 municipal towns only two Lashkar and Ujjain, figure as census cities. Ujjain was for the first time treated as a city at the last census though its population fell far short of the numerical standard prescribed for cities. The reasons for this preferential treatment are explained in the Census Report of 1931 and are reproduced below —

From ancient times a capital city it was the seat of Scindia's Government till the year 1810. It has had its eclipses in the past but it still retains its cultural endowment and metropolitan character. The life of its inhabitants is highly urbanised and it possesses in an eminent degree the psychological mechanism by which a city thrusts itself into the subjective

Towns classified by population with variation since 1891

life of its inhabitants. It stands astride important traffic routes and railways and is so ancient and sacred that it attracts year by year thousands of pilgrims from every part of the country. In recent years it has found in the cotton industry a force that has contributed considerably to its expansion."

The town showed a considerable expansion over the last decade and present indications are that its development will continue to be a marked feature of the State's urban life. The city includes the Ujjain and Madhavnagar municipalities and the Ujjain Cantonment.

Lashkar town at the last census included only the Lashkar Cantonment. On the present occasion it also includes its satellite towns of Gwalior and Morar which both fall within its orbit and are administered by its municipality. Adjustments on account of this change have been incorporated in the population figures given in this table.

Figures for cities have been separately given in Imperial Tables VI, VII, VIII, XI, XII A, XIIB, and State Table III.

4 *Variation in urban population*—The urban population of the State has increased from 392,631 to 549,976 during the decade

showing an increase of 40.1 per cent. As has been mentioned in note 2 above, five new towns have been added. If the population of these towns be excluded, the increase in population of the comparable towns comes to 34.7 per cent. The increase in rural population has been only 10.4 per cent.

If we take the towns individually, the highest increase recorded is 73 per cent in Morena. Next come Ambah (57.5 per cent), Shujalpur (53.7 per cent), Ujjain (48.7 per cent), and Basoda (48.3 per cent). The towns which have suffered a decrease are Karera and Bajrangarh.

The increase in the urban population of the State since 1891 has been 224,345 or about 69 per cent, the increase in the population of the comparable towns being 100,276 or about 38 per cent. During the same period the increase in the population of Ujjain City has been 134.3 per cent.

5 *Subsidiary Tables*—To this table have been appended two subsidiary tables which set forth—

Table IV (i)—Towns classified by population and their growth and

Table IV (ii)—Cities and their growth.

IMPERIAL TABLE V

Towns arranged territorially with population by communities

1 *General*—This table illustrates the urban distribution by communities whereas the corresponding table of the previous census shows that distribution by religion. The significance of this change has been indicated on the flyleaf of Imperial Table XIII. Here it is only necessary to say that so far as Gwalior is concerned this change has not in any way effected the comparability of the figures presented in this table with those of the previous censuses.

2. *Backward classes*—The backward classes in columns 6 and 7 include Bhils, Bhilalas and Sahariyas whose numbers are as follows —

| | Males | Females |
|-----------|-------|---------|
| Bhils | 1 202 | 1 108 |
| Bhilalas | 63 | 27 |
| Sahariyas | 339 | 309 |
| Total | 1 604 | 1 444 |

3 *Details of Others in columns 18 and 19*—Under Others the following communities have been included —

| Community | Males | Females |
|-------------------------------|-------|---------|
| 1 Europeans and Anglo-Indians | 114 | 120 |
| 2. Parsees | 101 | 79 |
| 3 Buddhists | 6 | |
| 4 Jews | 4 | 2 |
| 5 Unspecified | 3 | |

4 *Civil and military population*—The following table shows the distribution of civil and military population of the cantonments in the Gwalior State —

| Cantonment | POPULATION | | | | | |
|------------|------------|-------|---------|----------|-------|---------|
| | Civil | | | Military | | |
| | Persons | Males | Females | Persons | Males | Females |
| 1 Lashkar | 5,587 | 2,925 | 2,660 | 2,031 | 1,808 | 1,223 |
| 2. Morar | 4 057 | 2,125 | 1 932 | 5,330 | 3,621 | 1,718 |
| 3 Gooma | | | | 444 | 258 | 186 |
| 4 Ujjain | | | | 563 | 335 | 228 |
| 5 Agar | | | | 296 | 183 | 113 |
| Total | 9 654 | 5 053 | 4 601 | 9,673 | 6,205 | 3 468 |

5 *Subsidiary Tables*—Appended to this table are the following two subsidiary tables which show —

- 1 Table V (i) Number per 1 000 of the total population and of each main community who live in towns
- 2 Table V (ii) Communities of urban and rural population

A comparison of Subsidiary Table V (i) with the corresponding table of the last census shows that the proportions of the communities living in towns have remained the same.

About 75 per cent of the total Christians more than fifty per cent of the Muslims and forty per cent of the Jains live in towns whereas the corresponding proportion for the Hindus is only 10 per cent. It should be

Towns arranged territorially with population by communities

mentioned, however, that though the ratio of the Hindus living in towns to total Hindus is so low the urban population is preponderantly Hindu. Out of every ten thousand persons living in towns 7,313 are Hindus, 2,243 Muslims, 403 Jains and the rest "others". These proportions vary considerably from district

to district. Towns in the Morena district have the highest proportion of Hindus (8,074 in every 10,000) and Sheopur that of Muslims (3,015 per 10,000). Almost all the Jains of Bhind and Sardarpur districts and three-fourths of those of Goona and Bhilsa districts live in towns.

Imperial Table V—Towns arranged territorially

| District | Town, Municipality, Suburb, Cantonment, etc. | Population | | | Hindus | | | |
|---------------|--|------------|---------|---------|------------------|---------|--------|---------|
| | | Persons | Males | Females | Backward classes | | Others | |
| | | | | | Males | Females | Males | Females |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |

IMPERIAL TABLE VI

Birthplace

1. *General*—This table corresponds to Imperial Table VI of 1931. It gives statistics relating to the birthplace of all persons enumerated in the State and it is from this table that information is derived about migration from one district of the State to another and immigration from places outside its borders. As regards emigration to other parts of India no particulars have been obtained from the provinces and States concerned on this occasion and therefore Subsidiary Table VI (i) has been omitted.

On the enumeration slips the unit of birthplace recorded for the persons born in Gwalior was a district or city and for those born outside Gwalior the district, State or country.

2. *Subsidiary Table*—The main statistics of immigration have been summarised in the accompanying Subsidiary Table VI (ii). It shows that out of 4,006,159 persons enumerated

in the State 3,614,418 or 90.2 per cent were born within its borders. To the remaining 9.8 per cent, the provinces and States adjacent to the Gwalior State contributed 9.3 per cent and the non-contiguous parts only 5%. In 1931 these proportions were 92.0, 7.6 & .4 per cent, respectively. A consideration of these figures suggests two main conclusions. The first is the general immobility of the population. As many as 832 persons in every thousand were enumerated in the district where they were born. The second conclusion is that the proportion of the foreign born enumerated in the State shows an increase of nearly 2 per cent over the figures of 1931.

As far as inter-district migration is concerned, Gird shows the highest number of immigrants and Sardarpur the least. Immigration from adjacent provinces and States is largest in the Ujjain and Mandla districts.

Imperial Table VI

IMPERIAL TABLE VII

Age and Civil Condition

1 *General*—The age statistics presented in this table are combined with statistics relating to sex and civil condition

Part I of the table is a State Summary showing the distribution by age of the total population and of each community. In this part separate figures are given for each year of life up to the fifth, thereafter they are arranged in quinary groups up to 70

Parts II and III give statistics in detail for districts and cities, respectively, but in these parts fewer age groups are shown and separate figures are given only for communities which are locally important

2 *1ge*—The instructions to the enumerators for recording age were changed at this census. At the last census they ran—

“Enter the number of years to the nearest birthday or the nearest age (in years) known. For infants less than six months old enter 0, for infants six months old but less than eighteen months enter 1. In every case, the age must be shown in years. Months are never to be entered.”

At the present census the instructions given were—

“Enter the age in years and months on the 1st day of March 1941, if the precise date of birth is unknown, state approximate age in years only. In the case of infants of less than one year write 0 for years and give the number of months.”

In view of the approximate nature of the returns the practical effect of this change would generally be negligible and there is reason to

believe that in so far as it made itself felt at all it would probably lead towards greater accuracy

The crude figures of age are known to be very inaccurate and for a detailed account of the main sources of inaccuracy in the age returns the reader is referred to the Census of India 1921, Vol I, pp 126-127. It must suffice to say here that the actual age figures elicited at this census, though by no means free from the effects of the usual errors, have been so adjusted as to limit for statistical purposes the extent of their natural inaccuracy.

The figures now presented in the tables are shown in quinquennial group. These groups have been reached after a process of smoothing which differed from that adopted at the last census. The process followed on the present occasion is described in the sorting instructions issued by the Census Commissioner for India.

These instructions ran—

“The sorter will write the age periods 0, 1, 2, 3, 4, 5, 6, 7 and 8, 9 to 11, 12 and 13, 14 to 16, 17 to 21, 22 to 26, 27 to 31, 32 to 36, 37 to 41, 42 to 46, 47 to 51, 52 to 56, 57 to 61, 62 to 66, 67 to 71 and 72 and over on labels and paste them against the pigeon-holes one against each hole. He will sort the slips according to the above age periods. The instructions to the enumerators are to enter the age in years and months. Disregard months when entered and sort only for the years' figure given. When they are all sorted he will take the slips in each pigeon-hole and sort them again into four heaps for the unmarried, married, widowed and divorced, respectively.

Imperial Table VII

Hitherto compilation effort has been simple and straightforward largely a matter of copying and arrangement. With Table VII we encounter the first substantial effort of compilation in the proper sense where regular and systematic calculation and attribution of fractions are required. Consequently particular care and regularity and concentration are necessary. Compilers will have to divide a succession of figures into 2/5 and 3/5 and allot each part to its proper compiler's age group. It is most important that these fractions should not be mixed up and it may help if compilers are reminded that the 3/5 always comes in an earlier age group than the 2/5 thus when one element of any head H I J etc. remains for allocation the other having been disposed of it should invariably be the smaller fraction.

The first process is to convert the sorters age groups into compilers age groups. The compilation ticket for this purpose will be as follows —

| Sorter age group | Number of persons Unmd. M.W.D | Formula | Compiler age group | Number of persons Unmd. M.W.D |
|------------------|-------------------------------|------------|--------------------|-------------------------------|
| 0 A | | A | 0 | |
| 1 B | | B | 1 | |
| 2 C | | C | 2 | |
| 3 D | | D | 3 | |
| 4 E | | E | 4 | |
| 5 F | | $F+G+3/5$ | H | 5-9 |
| 6 G | | $2/5H+3/5$ | I | 10-14 |
| 7 11H | | $2/5I+3/5$ | J | 15-19 |
| 12 16 I | | $2/5J+3/5$ | K | 20-24 |
| 17 21 J | | $2/5K+3/5$ | L | 25-29 |
| 22 26 K | | $2/5L+3/5$ | M | 30-34 |
| 27 31 L | | $2/5M+3/5$ | N | 35-39 |
| 32 36 M | | $2/5N+3/5$ | O | 40-44 |
| 37 41 N | | $2/5O+3/5$ | P | 45-49 |
| 42 46 O | | $2/5P+3/5$ | Q | 50-54 |
| 47 51 P | | $2/5Q+3/5$ | R | 55-59 |
| 52 56 Q | | $2/5R+3/5$ | S | 60-64 |
| 57 61 R | | $2/5S+3/5$ | T | 65-69 |
| 62 66 S | | $2/5T+U$ | 70 & Over | |
| 67 71 T | | | | |
| 72 & Over U | | | | |

On account of the marriage customs of this country it is necessary to break up the adolescent age period into smaller periods in order to avoid the wrong allocation of civil condition. Consequently the two five-year sorters groups between 7 and 16 are broken into groups of alternately 2 and 3 years each as shown in the formula below. The sorters have already performed the special sorting into these groups and the important point here is for the compiler to remember the different formulae he has to apply. Unlike in the general age case the smaller fraction is allocated in the earlier group.

| Sorter age group | Number of persons M.W.D | Formula | Compiler age group | Number of persons M.W.D |
|------------------|-------------------------|-------------------------------------|--------------------|-------------------------|
| 5 F | | $F+G+H()+ 5-9$ $1/5H()$ | | |
| 6 G | | $2/5H()+ 10-14$ $I()+1/5 I()$ | | |
| 7 6H () | | | | |
| 9-11H () | | | | |
| 12 13 I () | | | | |
| 14-16 I () | | | | |

"The number of unmarried will be obtained by subtracting from the total population in each age group the number of married widowed and divorced obtained as above described.

3 Sex and Civil Condition—There was nothing in the circumstances of the Census of 1941 in this State likely to occasion special difficulty either in the enumeration of females or in the recording of civil condition. There may have been some omissions from the married by very strict Hindu enumerators refusing to regard re married widows as married but such omissions would be more than counterbalanced by the inclusion among the married of the females living in unregulated relations with men.

4 *Subsidiary Tables*—Attached to this table will be found the following subsidiary tables —

(a) *Relating to Age* —

1 Table VII (i) Age distribution of 10,000 of each sex in the State and each Natural Division

2 Table VII (ii) Age distribution of 10,000 of each sex by main community

3 Table VII (iii) Proportion of (a) Children under 10 and of persons over 60 to those aged 15-40, (b) married females aged 15-40 per 100 females, for total population and in certain communities

4 Table VII (iv) Percentage variation in population by age

5 Table VII (v) Actual ages returned at the enumeration

NOTE —This table has been prepared for Pargana Pichhore in Shivpuri district and Pargana Shajapur of Shajapur district

(b) *Relating to Sex* —

6 Table VII (vi) Proportion of sexes by Natural Divisions and Districts

7 Table VII (vii) Females per 1,000 males by main communities and age

8 Table VII (viii) Females per 1,000 males by main communities, age and Natural Division

(c) *Relating to Civil Condition*—

9 Table VII (ix) Distribution by civil condition of 1,000 of each sex, community and age

10 Table VII (x) Distribution by civil condition of 1,000 of each sex and age by Natural Division and community

11 Table VII (xi) Sex-ratio by civil condition, age, community and Natural Division

5 *Number of Divorced persons*—In this table

| Community | No of divorced persons | | divorced persons are not shown separately, they are included among "widowed" |
|------------------------|------------------------|--------------|--|
| | Males | Females | |
| All communities | 1,431 | 2,138 | The details of "divorced" are given in the inset |
| Hindus | 1 322 | 1 953 | |
| Muslims | 102 | 174 | |
| Jains | 6 | 2 | |
| Christians | | 9 | |
| Others | 1 | | |

6 *Fertility Enquiry*—At this census an attempt was made to collect some fertility data by asking about married females the following three questions —

(1) Number and sex of children born and surviving

(2) Mother's age at birth of the first child, and

(3) Sex of the first child

It has not been possible on grounds of expense to tabulate for the whole of the State all the material thus collected The tabulation has been confined to —

(1) Certain selected communities which differ from one another in their general mode of life, and

Imperial Table VII

(2) Sample slips of married females as a whole

*5 Table V Age of mother at birth of first child and number of children born

The following seven Fertility Tables have been constructed —

- *1 Table I Size of family
- 2. Table II Sex of the first born
- 3 Table III Size of family according to community
- 4 Table IV Size of family by age of mother at birth of first child.

*6 Table VI Age of mother at birth of first child and number of children surviving

7 Table VII Number of children born and surviving

*The basis of the figures in these tables are the slips for completed fertility

Imperial Table VII—Age and Civil Condition—*Part I—State Summary*

| Community and Age | Population | | | Unmarried | | | Persons | Married | | Widowed | | |
|-------------------------------|------------------|------------------|------------------|------------------|------------------|----------------|------------------|----------------|----------------|----------------|----------------|----------------|
| | Persons | Males | Females | Persons | Males | Females | | Males | Females | Persons | Males | Females |

IMPERIAL TABLE VIII

Means of Livelihood

1 *General*—The scheme of the classification of occupations adopted in this table is prescribed by the Government of India and differs in minor respects from that of 1831

The occupations have been divided into 4 Classes, 12 Sub-Classes, 55 Orders and 235 Groups. The Groups which had no entries against them have been omitted from the table.

The table is divided into three parts. Part I contains complete statistics for each Class Sub-Class Order and Group for the State as a whole. In Part II the figures for each district are given by Class Sub-Class and Order only while Part III contains similar statistics for cities

2. *An Explanation*—The entire population was divided for the purpose of this table into three classes (1) Non-dependants : i.e. the persons who were self-supporting (2) Wholly Dependants : i.e. persons who had no income in cash or kind and (3) Partially Dependants by which was meant such persons as made some contribution in cash or kind towards the support of the household without being definitely capable of looking after themselves. The distinction between the three categories was carefully explained to the enumerators by means of numerous examples. The enquiry was a difficult one but the entries on the slips were generally found to be more precise and accurate than on any previous occasion

The table has been broken into 5 columns. 'P' represents persons who have one principal means of livelihood without any subsidiary means of subsistence, PS which includes persons who combine one principal occupation

with a subsidiary one S which denotes the number of persons who follow the occupation mentioned against them as subsidiary PD which stands for partially dependants that is to say such persons to whom the occupation offers an inadequate livelihood and finally TD under which figure the total dependants. It should be observed that the partially dependants occur twice in the table. This is on account of their dual role of earner as well as dependent. The activity which they themselves pursue is shown under PD while the means of livelihood of the person on whom they are dependent appear under TD which of course includes in addition those who are wholly dependant. Similarly persons who have a subsidiary occupation to supplement their main occupation are repeated.

The advantage of the new system of grouping lies in this that it is possible at once to find the total number of persons who are dependent on any particular means of livelihood P+PS+TD

The other changes since 1831 are

- (i) The substitution of Non-dependants, Partially Dependants and Wholly Dependants in place of Earners, Working Dependants and Non working Dependants
- (ii) The Non working Dependants who on the previous occasion were all lumped together as a separate class have now been shown separately against the occupation on which they are dependent, and

(iii) Persons having a subsidiary occupation in addition to the principal means of livelihood have been grouped separately from those who have no subsidiary occupation

3 *Economic Aspect emphasised*—A special feature of the present census has been the shifting of the emphasis from the social to the economic aspect of the enquiry. Thus while the tables on religion and caste, have been dispensed with very valuable information bearing on present-day economic problems have been collected. For the first time, statistics relating to persons who assist in household work and paid assistants have been compiled. Enquiry as to unemployment which in 1931 was confined to educated persons only and was only partially carried out by means of a special schedule was on this occasion extended to all classes of the unemployed and was included in the scope of the census investigation. Finally, an effort has been made which is a repetition of earlier efforts, but on different lines,

to estimate the extent of associated or organised industry

4 *Subsidiary Tables*—At the end of the table will be found the following Subsidiary Tables which show—

Table VIII (i)—General distribution of means of livelihood

Table VIII (ii)—Independent workers per 1,000 total population (by Sub-Classes)

Table VIII (iii)—Partly Dependants following the activity per 1,000 total population (by Sub-Classes)

Table VIII (iv)—Distribution per 1,000 total population (by Classes)

Table VIII (v)—Partly Dependants following the activity per 1,000 total population (by Classes)

Table VIII (vi)—Means of livelihood of females and comparison of occupations

Table VIII (vii)—Partially agriculturists and assistants employed

Imperial Table VIII

Imperial Table VIII—Means of

| Group No. | Means of livelihood | P | | |
|-----------|---|---------|--------|---------|
| | | Persons | Males | Females |
| 1 | 2 | 3 | 4 | 5 |
| | 9. Ceramics | 8,511 | 8,053 | 458 |
| 79 | Potters and makers of earthenware | 7,523 | 7,530 | 373 |
| 80 | Brick makers | 443 | 363 | 49 |
| 81 | Tile makers | 26 | 26 | |
| 83 | Makers of glass and crystalware | 9 | 9 | |
| 84 | Makers of glass bangles, glass beads and necklaces, glass ear studs, etc. | 110 | 104 | 6 |
| 85 | Other workers in ceramics (mosaic, tile, plaster of Paris, mica, alabaster etc., works) | 1 | 1 | |
| | 10. Chemical products properly so-called and analogues | 4,867 | 3,631 | 426 |
| 86 | Manufacture of matches, fireworks and other explosives | 236 | 272 | 14 |
| 87 | Manufacture of aerated and mineral waters and ice | 28 | 37 | 1 |
| 88 | Manufacture and refining of vegetable and hydrogenated oils | 3,214 | 2,865 | 329 |
| 89 | Manufacture and refining of mineral oils | 3 | 3 | |
| 90 | Others (soap, candles, perfumes and toilet goods, etc.) | 88 | 87 | 1 |
| 91 | Manufacture of dyes, paints, colours, varnishes and lakes | 11 | 11 | |
| 92 | Manufacture of chemicals, drugs and other pharmaceutical goods | 16 | 16 | |
| 93 | Manufacture of paper, cardboard and paper mache | | | |
| 94 | Manufacture of shellac and lac products | 411 | 330 | 81 |
| | 11. Food industries | 6,240 | 5,419 | 821 |
| 95 | Rice pounders and huskers and flour grinders, millers of cereals and pulses | 1,002 | 447 | 555 |
| 96 | Grain parhars, etc. | 330 | 298 | 71 |
| 97 | Bakers and biscuit makers | 30 | 29 | 1 |
| 98 | Butchers | 1,715 | 1,695 | 20 |
| 99 | Sugar manufacture and refining (and molasses) whether factory or Khandwari | 30 | 28 | 2 |
| 100 | Gur (or jaggery including rab) | 64 | 56 | 8 |
| 101 | Sweetmeat, and condiment makers | 2,426 | 2,290 | 137 |
| 102 | Butter, cheese and ghee makers | 23 | 19 | 4 |
| 103 | Brewers and distillers | 30 | 26 | 1 |
| 104 | Manufacture of tobacco | 402 | 392 | 10 |
| 105 | Manufacturers of opium, ganja, etc. | 86 | 86 | |
| 106 | Manufacturers of opium, ganja, etc. | 84 | 72 | 12 |
| 107 | Others | 18,168 | 16,971 | 1,194 |
| | 12. Industries of dress and the toilet | 6,928 | 6,469 | 459 |
| 108 | Tailors, milliners, dressmakers and dressers | 230 | 207 | 23 |
| 109 | Embroiderers, hat, cap and turban makers | 1 | 1 | |
| 110 | Other industries pertaining to dress (garters, belts, buttons, umbrellas, canes, etc.) | 4,432 | 3,773 | 659 |
| 111 | Washing and cleaning | 6,540 | 6,456 | 82 |
| 112 | Barbers, hairdressers and wig makers | 31 | 33 | 1 |
| 113 | Other industries connected with the toilet (tattoos, shampoos and bath houses, etc.) | 56 | 50 | |
| | 13. Furniture industries | 80 | 80 | |
| 114 | Cabinet makers, carriage painters, etc. | 5,414 | 5,245 | 169 |
| | 14. Building industries | 221 | 201 | 20 |
| 115 | Lime burners and cement workers | 155 | 98 | 59 |
| 117 | Excavators and well sinkers | 1,217 | 1,175 | 42 |
| 118 | Stone cutters and dressers | | | |
